

MAPS V: MCH/HIV Systems Integration

MAPS (Mapping AIDS Prevention Strategies) is a series of CityMatCH-developed community tools for action planning

Team _____

- 1) What is the general organization of your local public health agency?
 - a) Draw the general structure of your local public health agency.
 - b) Indicate with a  where main Perinatal HIV Prevention activities are.
 - c) Indicate with a  where the lead accountability for outcomes/results in Perinatal HIV Prevention falls. (eg. When the newspaper calls about Perinatal HIV, whom does the Director of Health call?)
 - d) Draw the leading perinatal HIV initiatives in your community outside of the local health department. (e.g. major players, structures, coalitions, advisory committees, funding sources, etc.)
 - e) Then initial where you are.

-
- 2) What does your Local Health Department Perinatal HIV Map tell you?
 - a) Are all activities fully known to all players?
 - b) How clear is accountability for results?
 - c) Are there clear linkages within the health department between activities? Between the local health department and activities outside?

MAPS V: MCH/HIV Systems Integration

MAPS (Mapping AIDS Prevention Strategies) is a series of CityMatCH-developed community tools for action planning

Team _____

3) What factors and forces hinder and help better integration between MCH and HIV for Perinatal HIV Prevention (e.g. community persuasion, support, diplomacy, incentives, technical assistance, etc.)

Barriers to Bust	Dynamics to Sustain or Increase Integration
<ul style="list-style-type: none">••••••	<ul style="list-style-type: none">••••••

4) Identify at least one action or strategy you can do together in the next three months to achieve greater integration between MCH and HIV to prevent perinatal transmission.
