

**Table 3D: The feto-infant mortality number and rate, and the number and rates for the four Perinatal Periods of Risk components for the Hispanic population,**

US urban Counties and Cities with over 250,000 population by State, 1998-2000.

Shading indicates major data reporting problems based on Tables 1C-1D. Geographic units with 10% or more missing deaths in any one category or combined, or units with 10% or more imputed deaths overall were considered having major reporting problems. In addition, units with 10% or more missing maternal race/ethnicity for combined deaths were also identified as having major reporting problems.

**Classification of the major reporting problems is as follows:**

- A Over 10% missing infant deaths, 5% or more of them are unlinked;
- B Over 10% missing infant deaths, 5% or more of them are linked;
- C Over 10% missing fetal deaths;
- D Over 10% imputed combined deaths, 10% or more imputed infant deaths;
- E Over 10% imputed combined deaths, 10% or more imputed fetal deaths;
- F Over 10% missing maternal race/ethnicity, 10% or more among infant deaths;
- G Over 10% missing maternal race/ethnicity, 10% or more among fetal deaths.
