

Table 4B: The feto-infant mortality number and rate, and the number and rates for the four Perinatal Periods of Risk components,

US urban Counties and Cities with over 250,000 population by State, 1995-1997.

Shading indicates major data reporting problems based on Table 1B. Geographic units with 10% or more missing deaths in any one category or combined, or units with 10% or more imputed deaths overall were considered having major reporting problems.

Classification of the major reporting problems is as follows:

- A Over 10% missing infant deaths, 5% or more of them are unlinked;
- B Over 10% missing infant deaths, 5% or more of them are linked;
- C Over 10% missing fetal deaths;
- D Over 10% imputed combined deaths, 10% or more imputed infant deaths;
- E Over 10% imputed combined deaths, 10% or more imputed fetal deaths.
