

PEDIATRIC RADIOLOGY

Contact: Lisa Laurent (449-4753)

When to contact: One month prior

Preceptors: James Phalen, M.D.

Where to meet: Office – 601 N. 30th Street- 3rd floor – Radiology Department

Purpose:

Provide additional subspecialty experience for residents in pediatric radiology.

Objectives:

1. The resident will review films on common and acute pediatric illnesses to better identify pathology through radiological films.

Methods:

Residents will be expected to review pediatric laser disk programs and teaching files. They should attend NICU radiology rounds with the staff radiologist and neonatologist and NICU team.

Implementation:

The primary goal of the rotation is to provide additional exposure for the residents in pediatric radiology.

Evaluation:

The attending staff physician will complete an evaluation report of the resident. Successful completion of the rotation will be based upon staff physician's review of the resident's ability to accurately read radiology films.
